The QLS-3001

QLS-3001 with service cover open to show print stations and media supply.

Two Side/Three Color Printing

The QLS-3001, with three print stations, prints three colors – two on one side and one on the opposite side simultaneously. So you can print two color fields on one side of your label while you print bar codes on the opposite side. All in one pass.

High Resolution Thermal Transfer Printing

Each station uses advanced 304 dpi thermal transfer printing technology. The result is bold colors, lithographic quality printing. A wide range of colors is available, including metallic gold and silver plus many reds, greens, blues, browns, and of course, black. Plus matched labels including several types of care labels.

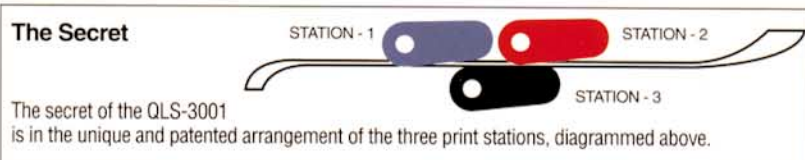

When coupled with the available cutter-stacker accessory, Model CS-40, the QLS-3001 is a complete label and tag manufacturing system... right in your own plant.

Easy To Use

The QLS-3001 is easy to use. All you need is a PC or MAC and our *Color QuickLabel™ For Windows®* software package with *MicroCell™* halftoning. Simply design your two side label, select the colors and print. And, once you've designed your labels, repeat jobs are a snap. All you do is pop in your floppy disk, make a selection, and print. With an intuitive menu-driven backlit LCD display and simple controls, the QLS-3001 can be unpacked, loaded with ribbons and stock, and printing in two hours. Of course, the QLS-3001 comes with a fully illustrated operations manual and a limited warranty.

Fast Payback

The QLS-3001 will reduce actual label costs and greatly improve productivity because it will let you produce all types of two side labels *as required*, thereby eliminating inventories.

SPECIFICATIONS

- Printing Technology** Thermal Transfer; Spot Color
- Print Stations** Three; two one side, one opposite side
- Resolution** 304 dpi. all stations
- Resident Bar Codes** All Standard
- Label Size** W. - 1" Min. to 4.625" Max. (4.4" Print Max.)
L. - 0.2" to 22"
Thickness - 12 pt. Max.
- Ribbons** Three; Length - 300 meters
- Interface** RS-232 and RS-422 plus Centronics parallel
- Label Creation Software** Standard: Windows® 95 or Macintosh® Driver with *MicroCell™*
Optional: *Color QuickLabel™ for Windows®* with *MicroCell™*
- Print Speed** Up to 5" per second
- Dimensions** 20"(508mm)H x 17"(432mm) D x 22"(559mm) W
- Weight** 84lb. (38 kg)
- Power Requirements** 110/240 VA/C, 50/60 Hz, 400W

Resident Bar Codes and Fonts

Resident within the QLS-3001 are all standard bar codes plus a number of fonts along with TrueType™ scaleable fonts from Agfa®.
